

PRESS RELEASE 19-04

JAGUAR NICKEL INC.

Strengthens its Team and adds Richard Weizenbach as Manager, Engineering

September 23, 2004, Toronto, Canada: John Yates, President of Jaguar Nickel Inc., is pleased to announce the appointment of Richard Weizenbach to the position of Manager, Engineering of the Sechol Nickel Laterite project. Mr. Weizenbach will be responsible for all engineering aspects of the project.

Mr. Weizenbach brings to the Company more than twenty-five years of varied experience in the operations, design and commissioning of base and precious metal process plants worldwide. He has held senior technical and operating positions with Hatch Engineering, Anaconda Nickel and Sherritt International. Mr. Weizenbach's experience will make him a key contributor to the project team led by Senior Vice President, Hugh Duncan.

Jaguar Nickel is a well funded, professionally managed resource company involved in developing nickel-cobalt laterite properties in Guatemala, Central America. The Company is developing an innovative and proprietary atmospheric leaching technology that has the potential to be economically and environmentally superior to traditional metallurgical treatments.
